

## Module 2 Learning Objectives:

1. Describe at least four different types of trauma and the effects those traumas have on children in play therapy treatment
2. Explain how Adverse Childhood experiences affect the lifespan of a person
3. List at least four behavior effects of trauma and how they are seen in play therapy treatment
4. Name three considerations when determining if Theraplay is the appropriate intervention for a child or family
5. Demonstrate the ability to create one play therapy treatment goal for each of Theraplay's dimensions
6. Identify three issues that require consideration before working with a foster care family
